 - Status (MITRE)
 - o Server down for a few days and across the weekend
 - o Should be up, now
 - o AWS migration still pending, so performance metrics are for now not mitigatable
 - For periodic cached database updates, don't do it all at once – add some randomness to the time of the update...
 - Feedback
 - o Not enough feedback to drive “new” direction if required
 - o In-meeting feedback (RedHat) based on API review: no changes required, for now
 - o Roll-out to, for example HW CWE Special Interest Group SIG, User Experience WG, or other MITRE-sponsored collection of CWE database curators will be decided by MITRE for short-term expansion of feedback pool
 - o Filtering done by top-level elements (title, description, etc.) is on tap and will be available in about 3 weeks
 - Suggest delaying and shrinking meeting time (9:30-10am)
- 5) Action item review
 - **WG: please access the server and send feedback**
 - Status update
- 6) Adjourn
