CWE-CAPEC REST API Working Group Meeting August 25th
1) Call to order
2) Agenda Approval
3) Minutes Approval
4) Action item review
    a. Spec discussion
        i. CWE Content Spec Review
            1. Enumeration changes
            2. Capec view category autogenerated and pushed
        ii. Enumeration automation
            1. Internal to MITRE
    b. Response detail review, and or pure status update (Kent, Steve C.)
        i. 1:1 comparison – identified misses/stumbling blocks in weaknesses
    c. MITRE IT collaboration for infosec approval
    d. Contract Mod being fielded by senior management
    e. Do not need to return nested JSON representing tree structure (parentOf, and Relationships(childOf) sufficient) – can return flat structure of weaknesses/categories or IDs
    f. CAPEC
        i. No updates – just finalizing
    g. No interest in a github alpha version of the MVP
5) Timeline
    a. Contract Mod (~)
    b. Infosec approval (~2 months)
    c. December Beta Testing of API which exceeds MVP capabilities – some level of search capability
        i. Current demo code by Kent achieves MVP capabilities (as far as Luke is aware)
6) Action Item review
    a. Status update
    b. Kent update regarding responses
7) Adjourn
